by **Bernie Murphy**

This edition of PIRE News is dedicated to the creator of our corporate newsletter, **Diane Williams**, and the many significant contributions she has made to PIRE over the last 22 years. Diane is retiring after the July Board meeting on August 11th.

I first met Diane in the Air Right's building in Bethesda in 1995. I was invited to participate in the PREVENT proposal development. As I walked around to Diane's interior windowless office to share my letter of intent to lead the Navy project, I was struck by how elegantly she had decorated her space. A silk rose bouquet of flowers in a tall china vase was positioned in the corner, indirect lighting created a warm glow, and her desk was carefully organized with matching accessories. I was impressed, as we all have been, with Diane's style and grace. From Bethesda, we moved to Rockville, then Calverton, and then to a second Calverton building. Now I am moving back to the 10th floor, as Calverton consolidates, while Diane moves on to retirement.

She will be missed.

Diane has an MBA and is a certified conference planner, and PIRE benefited immensely from her expertise. Her dedication to PIRE and helping create our branding and corporate togetherness was met with some appreciation but mainly resistance and apathy. She persisted with the PIRE logo, mugs, pens, shirts, and such. On the 30th anniversary of PIRE, some years ago, she organized Center dinner celebrations, and we each received PIRE logo framed plaques indicating our years of service. Her many PIRE events are renowned.

She also served as Corporate Secretary for the PIRE Board and organizer of Board meetings, logistics, food, wine selections (until she delegated to Board Director Brian O'Neill), and all the details that make a meeting flow smoothly. Her many organizational contributions to the Board are notable, as the Board expanded, changed, and transformed from a Founder's Board to our current self-perpetuating Board. Most remarkable is her attendance; Diane never missed a Board meeting.

We thank you, Diane, and wish you well. Your many contributions are now part of the fabric of PIRE.

### **PIRE's Special Edition: *Journal of Primary Prevention*—Marijuana**

---

*Well Done!* Please note the Special Edition of the *Journal of Primary Prevention* (see [Spotlight: Special Issue](#)), **Chris Ringwalt**, Editor. Chris stepped aside for this special edition and **Karen Friend**, **Bridget Freisthler**, and **Bettina Friese** served as PIRE guest editors. This is an important contribution to PIRE's continued expansion into drug research, especially as California readies for taxation on the sale of marijuana and the promise of new research funding. Thank you to the PIRE authors of original papers:

**Robynn S. Battle**, **Bridget Freisthler**, **Andrew Gaidus**, **Joel W. Grube**,  
**Paul J. Gruenewald**, **John H. Lacey**, **Mallie J. Paschall**, **William R. Ponicki**,  
**Eduardo Romano**, **Sue Thomas**, and **Robert B. Voas**.

### **PIRE at the June Research Society on Alcoholism (RSA)**

---

PIRE Staff reaffirmed our corporate commitment to alcohol research with their participation at RSA. Congratulations to **Juliet Lee**, Myra Parker, and **Eduardo Romano** for their collaboration and leadership for the second successful Alcohol and Health Disparities day-long [workshop](#). The event was co-sponsored with the University of Washington. Thank you to **H. Westley Clark**, Vice Chair of the PIRE Board, for his participation and excellent closing remarks at this workshop.

PIRE Staff also participated in [six symposiums and 15 posters](#).

Sunday evening at the Appaloosa Grill in downtown Denver, we held a reception that was well attended by PIRE Staff, NIH representatives, colleagues, and collaborators. Past Board Chair **Barbara McCrady** and RSA President **Kenneth Sher** attended. The PRC postdocs enjoyed an impromptu NIH seminar on grants writing by NIAAA staff, organized by **Joel Grube**. See [photos](#) in this issue. This was the third PIRE promotion and recruitment event this year. Several promising contacts were made at the event. Next year, RSA will be in San Diego; plans are underway.

### **PIRE Mid-year**

---

At the mid-year point of our fiscal year, we are forecasting to be below our provisional fringe rate. The hard work of proposal development is producing results. There are also multiple applications under review.

Congratulations to **Paul Gruenewald** and the PRC team for their NIAAA center grant submission and reverse site visit.

July was very disruptive for two centers. The fire in Oakland, next to 180 Grand, impeded work. Staff are now able to go back and work in the building after a week of temporary repairs. The Calverton Central Business Office Staff are in the final phase moving to the 10th floor to consolidate space. I extend my appreciation to Staff for their patience and cooperation during these significant disruptions.

Please do take time to enjoy this summer and be safe.

A handwritten signature in black ink that reads 'Bernie'.

*Coauthors: Beth Bourdeau, Hilary Byrnes, Veronica Rogers, Mark Johnson, Dave Buller*

### Health Disparities Workshop

PIRE, in partnership with the University of Washington, sponsored a workshop on health disparities in alcohol and other drug problems.

#### Health Disparities in Alcohol and Other Drug Problems and Health Equity Approaches: Theories, Methods, and Applications (2017)

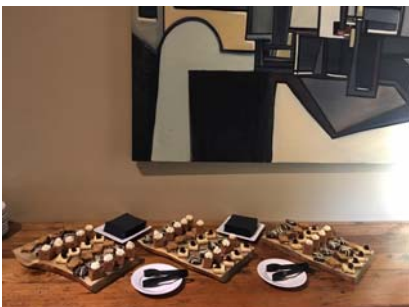

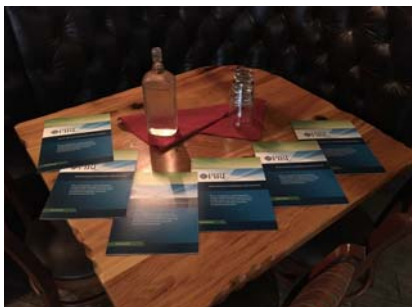

*Co-Organizers: Juliet Lee & Eduardo Romano (PIRE), Myra Parker (UW)*

This informal and highly interactive workshop will convene an intensive working group to (1) review scientific goals for research on disparities in problems related to use and misuse of alcohol and other substances, (2) provide theoretical and methodological frameworks for research and prevention, (3) consider social-cultural contexts which represent challenges and opportunities for advancing the science of AOD-related health disparities, and (4) demonstrate practical means to address these challenges and utilize opportunities with evidence-based, culturally-based, and community participatory approaches. Taking advantage of the meeting location in Denver, at the nexus of the Great Plains and the Southwest, this year's workshop will focus on issues specific to American Indian/Alaska Natives and Latino/a populations in the US. Also because of the meeting location in Colorado, at the forefront of state legalization of recreational cannabis, workshop participants will consider cross-cutting issues in use of alcohol, cannabis, and other drugs of abuse. Group discussions will enhance interaction and foster sharing ideas and developing future research. Tangible outcomes of this workshop include advancing health disparities research networking within RSoA to advance shared research interests and goals.

## Special Issue of the *Journal of Primary Prevention*: Marijuana Use and Possession Policy

**Karen Friend**  
Senior Scientist  
Decision Sciences Institute

Numerous states have passed laws allowing the use, sale, and possession of marijuana for medical purposes. More recently, Colorado, Washington, Alaska, Oregon, California, Maine, Nevada, Massachusetts, and the District of Columbia led the way for the legalization of nonmedical marijuana use, sale, and possession. Other states are in the process of introducing similar legislation for nonmedical marijuana. At the federal level, however, marijuana use, sale, and possession remain illegal, with marijuana classified as a Schedule 1 substance under the Controlled Substances Act of 1970, which states that the substance has a high abuse potential and no established medical purpose.

Advocates for and against legalizing the use, sale, and possession of nonmedical marijuana often approach the topic with strong opinions and emotional appeals. Such arguments are often, however, not grounded in research. Policymakers need empirical studies to help them come to informed opinions about this highly charged topic.

Chris Ringwalt  
(PIRE Chapel Hill)

Under the leadership of PIRE's Chris Ringwalt as editor and Karen Friend, Bridget Freisthler, and Bettina Friese as guest editors, a special issue of the *Journal of Primary Prevention* that examines the research related to nonmedical marijuana policy impact has recently been released. We believe the manuscripts by PIRE and other internationally known researchers will help bridge the gap between research and practice and ultimately lead to empirically based policy decisions.

**The Journal of Primary Prevention. [Volume 38 Number 3](#)** is now available online.

## Staff Development Award Summary: Society for Prevention Research 2017 Annual Conference

**Debbie Fisher**  
Research Scientist  
Calverton Center

The 25th annual conference of the Society for Prevention Research (SPR), ***Prevention and Public Systems of Care: Research, Policy and Practice***, was held in Washington, DC, on May 30-June 2, 2017. As a professional society, SPR reaches broadly across disciplines, including substance abuse, mental health, domestic violence, HIV/AIDS, criminal justice, health disparities, minority populations (racial/ethnic, sexual orientation), and more.

Perhaps not surprisingly given the referenda across states in recent years, the issue of legalization of marijuana was one of the topics highlighted. As part of the first morning's plenary session, Robert Doyle, Chair of the citizens' coalition Colorado Smart Approaches to Marijuana, addressed the issue. He took the position that Big Tobacco is very actively involved in the fight for legalization and that the move toward passing medical marijuana laws was a strategy to set the stage for full legalization by normalizing recreational use. To bolster his argument, he pointed to the fact that rather than the whole unprocessed marijuana plant, medicinal use only requires cannabinoids, the chemicals in marijuana. As Colorado and other early-adopter states like Washington are providing experiments from which other states may learn, he closed with a call to action, noting that there has been no assessment of the costs of marijuana legalization in Colorado, despite the reported increases in marijuana-related traffic crashes, hospitalizations, and lost work. Ted, this sounds right up your alley!

In a session on late-breaking issues in substance use and abuse, an example of a serendipitous opportunity for research in the context of an ongoing longitudinal study was presented. Guided by Minority Stress Theory, researchers at the University of Washington decided to examine whether mental health issues (i.e., anxiety, depression) and alcohol use increased from pre- to post-election disproportionately among members of racial/ethnic minorities and those with minority sexual

orientations, who were often the targets of controversial rhetoric and proposed policies and, thus, theorized to be more acutely experiencing threats from the election's tenor. Results showed significant elevations in self-reported anxiety and depression but not drinking from the pre-test period (August-October 2016) compared to the post-test period (December 2016-February 2017) among minority populations compared to White and straight Americans.

## ANNOUNCEMENTS

### Fire Near PRC Offices

Early morning (4:30 AM PST) on July 7th, there was a four-alarm fire at a construction site near the PRC office in Oakland. The building was closed that day given the firefighting activities nearby. No injuries were reported. Below are some photos from the scene.

View from patio of the Oakland office. The parking garage is where several PRC staff park.

From left: Construction site on June 21st, and on July 17th.

## PLEASE UPDATE YOUR PIRE STAFF INFORMATION TODAY

Staff can go online and update their own profile on PIRE's website. From <http://company.pire.org> select 'Modify Staff Information.' Then select the option to either update General Information & Bio, Staff Expertise, Projects, or request corrections to your Publications. Updating Staff Expertise allows you to choose your expertise, so that when staff are looking for other staff to help with a specific project, the staff members with that particular expertise will be listed. Once you have made your selection you need to log in by entering your employee id and your six digit birthdate. After you save your changes within any section you will be taken to a menu that allows you to access the other staff modification areas. In order to update your resume or picture you will need to email them to [dacanay@pire.org](mailto:dacanay@pire.org).

Your staff information can be viewed at <http://www.pire.org/staff.aspx>. Bios and resumes for researchers and practitioners can be viewed at <http://company.pire.org/Internal/staffcap.asp>, while administrative staff responsibilities in the Calverton office can be viewed at <http://company.pire.org/Internal/areasresp.asp>.
